San Rafael Sanitation District Newsletter

Doris Toy, P.E.
District Manager/District Engineer
111 Morphew Street, San Rafael, CA 94901

The San Rafael Sanitation District is beginning an outreach program to inform the public about our sanitary sewer system. Our crews are working hard to keep the District's sanitary sewer system well maintained.

We have a crew of seven who maintain 32 pump stations, 13 miles of force main, and clean 132 miles of sewer pipeline on a continuous basis throughout the District. We strive for an efficient operating sanitary sewer system.

We have encountered items in our sewer lines that are compromising the sanitary sewer system. The crews are finding an excessive amount of towel wipes in our pipelines that can create blockages. Please **DO NOT** flush these down the toilet.

Improper disposal can lead to sanitary sewer overflows and costly property damage due to backed up sewer lines.

The San Rafael Sanitation District appreciates your support.

If you have any questions, you may contact Karen Chew, Senior Civil Engineer at (415) 458-5369.

Any disposable towels will obstruct the sewer pipelines.

Blockage in Sewer Pipe
